

Annotation of the paper

1. Title: **Possible ways of entrepreneurial adaptation in Health Tourism, especially in Békés County (*facing new challenges*)**

2. Author's name: **Miron Szilágyi**

3. Year of Study and Study Specialisation: 3rd, tourism and catering

4. Consultant: Dr. Imre Simon

5. Content:

a) Main goal of paper: In my research plan, I tried to show some opportunities in health tourism, for example, how can we develop our national or regional tourism, and I tried to explore what can corporates do in, how can they provide enough money for health centres, how can they help health tourism.

b) Content of paper: I tried to make an overall picture about tourism, especially health tourism. Why is health tourism so important, how we can develop it, and what can corporates do. I tried to show the medical tourism, because it's a really important part of health tourism.

c) Achieved results: First of all, there are still some parts in health tourism, which need so much development. Well, I think corporates should make a cooperation, which can help to improve health tourism, for example hospitals. I think it's really necessary to make a cooperation, because if corporate work together, they can use the easier way to do their best.

6. Key words (3-5 words) health tourism, wellness, services, opportunities, thermal water, healing, corporate
