

Annotation of the paper

1. Title: **Development of Hungarian-Slovakian border regions – An Analysis of Hungarian-Slovakian NUTS 3 border regions**

2. Author's name: Bianka Géczy

3. Year of Study and Study Specialisation
Business management/Year of 2013

4. Consultant: Gábor Bodnár

5. Content

a) Main goal of paper:

In my paper I present and analyze the actual social and economic features of the Hungarian-Slovakian border regions using the NUTS 3 level indicators.

b) Content of paper:

In the first part of my work I introduce *Hungary-Slovakia Cross-border Co-operation Programme 2007-2013*. In the second chapter I present the main indicators of this *Programme* to analyse the territorial differences of the regions. I focus on main items like GDP/capita, unemployment rate etc.

c) Achieved results

The conclusions of the paper underline that the changes during the last decade, both in Slovakia and Hungary (and the Central-Europe as well) were determined by the accession to EU. On the other hand the Community is facing of its regional and structural reform, which may change the regional processes.

6. Key words (3-5 words)

border regions, cooperation, quantitative data analysis, development possibilities
