This work aims to identify challenges facing the European Union lobbying. To answer this question, the first part will be devoted to lobbying in Europe. In this part, we can then define lobbying, its history and the context in which it is used within the European Union. To understand what returns the lobbying, we define different strategies lobbyists and regulations governing lobbying in the European Union. The second part of this issue will be devoted to the analysis of the subject. We then ask whether lobbying is a threat to democracy by studying cases of corruption that took place in Europe and across that Atlantic. We finally see if there is a possible regulation of lobbying in the European Union.
